Designed for:	Use with timber joist ceilings, floors and ceiling systems for increased acoustic performance.
Product Code:	EVAB1
Size:	70mm x 30mm. 20mm vulcanised rubber gromit
Coating:	Electroplated zinc
Acoustic Isolation:	+10dB at frequencies 50-500 hertz (in concrete ceilings)
Maximum Load:	50kg
Maximum Deflection:	3mm
Fire Safety:	This product will not collapse if the rubber isolator should burn out.
Box Qty:	100
Box weight:	5.25kg (approx.)

Application Guide

Ceiling hangers are a good choice where you are able to lose 100mm (or about 4 inches) of ceiling height. It is one of the least intrusive methods of sound insulating your ceiling.

Fix the Evolution Acoustic Hanger to the base material using the correct combination of fastener and washer, do not overdrive the fastener, as this may lessen the acoustic performance.

Please refer to our product datasheets for individual fixing method advice and loadings information. These are available for download from www.evolutionfasteners.co.uk or by calling our Technical Department on +44(0)141 646 0055.

Base material	Fixing Type	Product Image
Steel (1.5 - 3.5mm)	TSHW5.5-38-3	
Steel (4.0 - 12.0mm)	TSHW5.5-50-5	
Timber	TSBW6.3-60-GP	
Concrete	MSHH6.3-57-516
