

TEK SCREW NEWS

Evolution Expand Bi-metal Tek Screw Range

Evolution Fasteners (UK) Ltd have today announced a significant expansion to their range of bi-metal tek screws to include:

Product Code	Description
BMBW5.5-135-3	5.5 x 135mm bi-metal, hex head tek screw for light steel + 16mm washer (100)
BMBW5.5-100-5	5.5 x 100mm bi-metal, hex head tek screw for heavy steel + 16mm washer (100)
BMWD5.5-85-5	5.5 x 85mm bi-metal, wing drill tek screw for heavy steel (100)
BMWD5.5-62-3	5.5 x 62mm bi-metal, wing drill tek screw for light steel (100)
BMHH5.5-50-5	5.5 x 50mm bi-metal, hex head tek screw for heavy steel (100)

Bi-metal Tek Screws: The Best of Both Worlds

During the manufacturing process for Evolution's bi-metal tek screws, carbon steel drill points are forged to stainless steel shanks before a bright zinc coating is applied to finish each screw.

Evolution bi-metal tek screws therefore offer fastening solutions that truly are the best of both worlds. They offer enhanced corrosion protection thanks to a stainless steel shank as well as superior drilling performance thanks to a carbon steel drill point.

Stainless steel shank		Carbon steel drill point		Enhanced corrosion and protection	Superior drilling performance
