

product datasheet

vertical flange clip

www.evolutionfasteners.co.uk

Designed for:	Fixing lighting or suspended wire to steel profiles, cable to 1.6mm - 2.5mm thick steel purlins or suspended ceilings to steel profiles.
Product Code:	VFC43
Size:	19mm x 43mm
Coating:	Yellow zinc passivated
Shank Material:	Carbon steel
Material Grade:	AISI C1022
Fire Tested:	Yes, to EN1364-1 (ask for details of our fire test results for more information)
Box Qty:	100
Carton Qty:	1,800

Recommended Working Loads	
Ultimate Load	Recommended Load*
0.74kN	0.19kN

* This recommended load has been calculated where the clip is not fixed by a self drilling screw. When fixed with a self drilling wafer head screw, higher tensile values can be achieved. We recommend that site testing is undertaken to calculate an accurate recommended load.

Application Guide

1. Place hook profile over the vertical of the purlin
2. Tap into place with a hammer
3. We recommend using a wafer head self-drilling screw to secure the clip (Evolution WHSDZ12)
4. Connect drop wires or chains through the eye of the clip
