

CORROSIVITY CATEGORIES

and examples of typical environments.

The corrosivity category which details the level of exposure and environment type the fasteners will have to face for their design lives.

 G1 VERY LOW	INTERNAL Clean, heated residential rooms without moisture.	 GRADE REQUIRED: EDZ4	
 G2 LOW	INTERNAL Rooms where condensation can occur.		EXTERNAL Rural areas with low pollution.  GRADE REQUIRED: EvoShield® 500
 G3 MEDIUM	INTERNAL Production rooms with some humidity.		EXTERNAL Urban areas with moderate pollution.  GRADE REQUIRED: A2-70
 G4 HIGH	INTERNAL Chemical plants, breweries, etc		EXTERNAL Urban areas with moderate salinity (1,000 - 2,000m from salt water source).  GRADE REQUIRED: A4-50
 G4 HIGH	INTERNAL Buildings with permanent condensation and high pollution.		EXTERNAL Coastal areas (≤ 1,000m from salt water source).  GRADE REQUIRED: A4-50
 GX EXTREME	INTERNAL Exceptionally aggressive environments (swimming pools, etc)		EXTERNAL Offshore  GRADE REQUIRED: A5-70
